Results on PBM-driven ODE discovery and ODE parameter estimation

Urh Primožič, IJS

ODE discovery with Probmot

TODO delovanje in potrebe po novem sistemu

Structure changes

Kar je novega v pybm, primerjava s probmotom

Other possible solutions

Vsi speedupi, ki niso implementirani, minus estimacija

Parameter estimation

problem , unobserved vs observed

Integration using multishooting

Matching

Integral matching

Batteling caotic loss surface

Integral lenght, homotopic methods

Collocation

matching on unobserved

Note on MAGI

TODO razlike

Question: lenght of integration interval

Results
